Plaintiff disussion. of case

Graduated from San Juan Bautista of Medicine in 1984. I did a residence of Pediatrics in Flushing Hospital Medical Center in New York, NY city and ended in Mayaguez Medical Center 1993. Both medical residence was accredited by the American Council of medical education (ACME) because I was graduated from a U.S. non-accredited medical school and cannot apply for Board certification in Pediatrics. In 1998 I obtain Medical licensure of Michigan. Without Board certification was impossible to get a job at Michigan or any other state including Veterans administration. In 2007 my medical school was finally accredited by U.S. and I decided to apply for board certification in 2013. 2 day before test a letter of denial was received. After Hurricane Maria in 2018 (sept) in a conversation with peer of same medical school and year. They took Pediatrics board in 2018. Soon after knowing that I contacted American Board of Pediatrics questioning its decision. After a web research I discover that at least 2 medical student from same year was board certified and working in the U.S.

, continued.

OCT 8, 2021

When Suzanne K. Wood MD executive Vice President
of the American Board of Pediatrics she wrote saying
and clearing Dr. Pino and Dr. Torres board even
she wrote was not found in it Database. Soon after
than I send a copy of Board certification of Dr. Pino
and Dr. Torres. Then she found those Dr in it
Database but explain that this was done in
a case by case basis and Blame me for not
applying during this time period. Because of that
I lost the opportunity to work in U.S. in which
I have a Michigan license making $\frac{1}{2}$ of money
of the states. I was not allowed to grow
as a professional such make another specialty
my son which is a autistic (severe) not received
proper care in Michigan and now is mentally retarded
non functional adult.
